ALGORITHM WHITEPAPER

ABSTRACT

Cryptocurrency, an encrypted, peer-to-peer network for facilitating digital barter, is a technology developed eight years ago. Bitcoin, the first and most popular cryptocurrency, is paving the way as a disruptive technology to long standing and unchanged financial payment systems that have been in place for many decades. While cryptocurrencies are not likely to replace traditional fiat currency, they could change the way internet-connected global markets interact with each other, clearing away barriers surrounding normative national currencies and exchange rates.

Technology advances at a rapid rate, and the success of a given technology is almost solely dictated by the market upon which it seeks to improve. Cryptocurrencies may revolutionize digital trade markets by creating a free flowing trading system without fees. A SWOT analysis of cryptocurrency is presented, which illuminates some of the recent events and movements that could influence whether cryptocurrency will contribute to a shift in economic paradigms.

DISCLAIMER

Information Published in the Whitepaper The whitepaper

The whitepaper provides information and material of general nature. You are not authorized and nor should you rely on the whitepaper for legal advice, business advice, or advice of any kind. You act at your own risk in reliance on the contents of the whitepaper. Should you decide to act or not act you should contact a licensed attorney in the relevant jurisdiction in which you want or need help. In no way are the contributors to the whitepaper responsible for the actions, decisions, or other behaviour taken or not taken by you in reliance upon the whitepaper. You are not authorized and nor must not should you rely on the whitepaper for legal advice, business advice, or advice of any kind.

Involvement Risks

The team does not recommend that any cryptocurrency should be bought, sold, or held by you. Do conduct your due diligence and consult your financial advisor before making any financial decisions. By purchasing Algorithm, you agree that you are not purchasing a security or investment and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the token "as is" and is not required to provide any support or services. You agree that by purchasing or exchanging Algorithm tokens you may not claim any tax, fee, reward or any transaction or activity from Algorithm, nor any of the Algorithm team members, nor any other third-party. Any functionality of the Algorithm application, the Algorithm Token as well as the Algorithm Project mentioned within the present whitepaper is of purely technical nature and not related to any legal claim of an Algorithm token holder.

Compliance with Tax Obligations

The team does not guarantee compliance with any country across the world. Always make sure that you comply with your local laws and regulations before you make any purchase.

No Warranties

The whitepaper is provided on an "as is" basis without any warranties of any kind regarding the whitepaper and/or any content, data, materials, and/or services provided on the whitepaper.

Limitation of Liability

Unless otherwise required by law, in no event shall the contributors to the whitepaper be liable for any damages of any kind, including, but not limited to, loss of use, loss of profits, or loss of data arising out of or in any way connected with the use of the whitepaper.

Future Statements

There may be matters in this whitepaper that are forward-looking statements. Such statements are subject to risks and uncertainty. Participants are cautioned not to place undue reliance on these forward-looking statements. The actual results or events that transpires afterwards may be different from what is implied here. The team shall not guarantee the accuracy of the forward-looking statements outlined in this whitepaper.

TABLE OF CONTENTS

ABOUT ALGORITHM

Algorithm is the new Token from Dutch soil and the new promise for the crypto market. Algorithm is a blockchain powered Decentralized platform built on the Binance network. Algorithm allows users and traders enjoy the flexibility offered by the Binance Smart Chain Network.

Our team at Algorithm is working on an application to trade automatically like a day trader. Advanced software that uses AI and pattern recognition technology makes it possible to make big profits in the crypto market and this profit will be back invested in the token. A demo is currently being worked on. In the future this application will be available for Algorithm Token holders.

When our algorithm starts trading, our team will provide monthly updates. Our coming application offers a lot of potential in the future. Buy Algorithm Token now and enjoy our prosperity.

PROBLEM

Algorithm Trading

Trading via algorithms is indispensable. Advanced mathematical models can make data-driven decisions at lightning speed. The price reactions to published economic figures are often striking. Right now, only the elite have the best algorithms on the crypto market. These algorithms invest in longer periods and not like a real day trader.

Transparency

Many tokens and companies are not transparent. This leads to speculation and ambiguity. This is not the case with Algorithm token, because we fight for transparency.

SOLUTION

Our Team

Our team wants to make it possible for everyone to day trade via an application. This application will start day trading through our algorithm 24 hours a day and will only be available for Algorithm token holders.

Algorithm

Our algorithm will also trade 24 hours a day 7 days a week like a day trader for you in the future! Users will see an overview of the trades to see how well the day has been. Our algorithm will learn through AI. Thanks to AI, the algorithm can learn from its mistakes and predict the price even better in the future and last but not least our developers keep working on the algorithm until there will be nothing to improve.

TOKENOMICS

Token Name: Algortihm

Symbol: ALGRTHM

Contract address: 0xc101dd1969095051e490561d53e05dba122c0b70
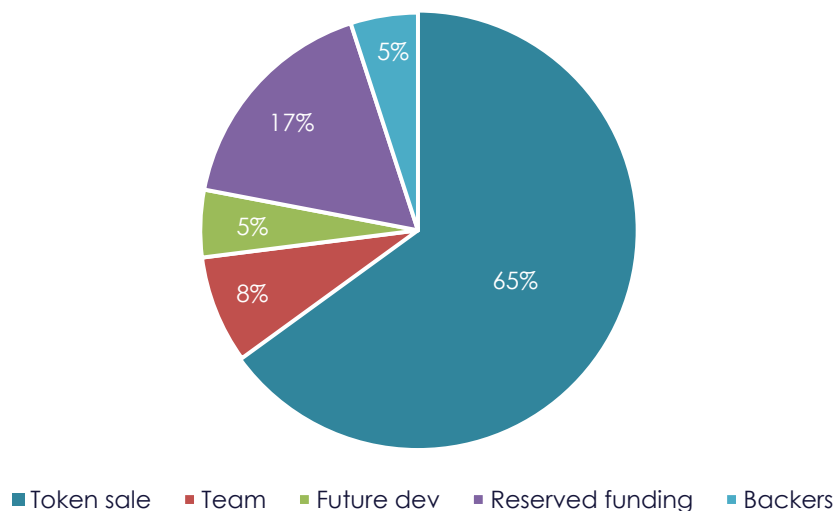

Network: Smart Chain

Decimals: 18

Total supply: 25,000,000
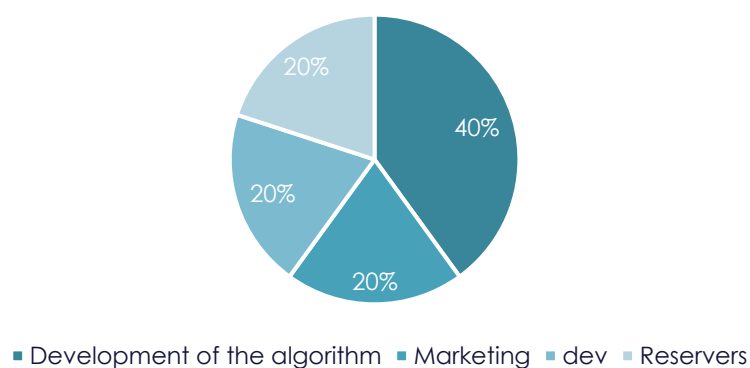

Technical limitation of tokens: 25,000,000

Secured ways to purchase tokens: BNB, WBNB, BUSD

- Twitter @AlgorithmToken
- Facebook @AlgorithmToken

Promoters:

- Youtube Channels
- TikTokers/ TikTok accounts
- Crypto influencers sites
- Celebrity influencers
- Telegram groups, channels and advert
- Giveaways

ROADMAP

2021

Launching the Algorithm Token(AlGRTHM)

Algorithm currency will be created to raise funds for the development of the Algorithm technology. By targeting different groups of users, the Algorithm currency will accrue in value exponentially overtime as the network increases in size. The earliest buyers will experience the most gains, with the lowest risk.

2022

The Future of our Algorithm and the Token

We will implement a global marketing campaign which will lead to exposure to millions of people worldwide. We will explore partnerships with big exchanges (i.e. Binance) and we will explore new partners to improve our algorithm. The algorithm will be more advanced with better AI software which will lead to more profit.

2023

Algorithm Token becomes big

The algorithm is going to make a lot of money. This money will be invested back in the token, causing the token to rise.

2024

Launching the application for users

We have successfully launched the application for users.

THE ALGORITHM ECOSYSTEM

Aglorithm Token

Algorithm (ALGRTHM) is a BEP20 token issued on the Binance Smart Chain with a total fixed supply of 25 million tokens. The first Algorithm tokens will be available on PancakeSwap.

Binance Smart Chain

The Binance Smart Chain (BSC) is a blockchain network that runs in parallel to the Binance Chain. In contrast to the Binance Chain, BSC features smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The Binance Smart Chain offers our community the added interoperability of facilitating their transactions through Ethereum based wallets, such as MetaMask. An added advantage of issuing Algorithm tokens on the BSC is that it offers our community an affordable blockchain experience through smaller transaction fees compared to the Ethereum Network.

PancakeSwap

PancakeSwap is a Binance Smart Chainbased Decentralized Exchange (DEX) for swapping BEP-20 tokens. To facilitate Algorithm's initial public offering, PancakeSwap offers our community the ability to exchange their BNB for Algorithm. In line with a pragmatic approach, Algorithm shall be listed into major exchanges in the near future.

BENEFITS OF BUYING THE TOKEN

Value increase

Holding the Algorithm tokens means you are supporting the future of day trading. Every single time a business joins the Algorithm network, the value of the network increases. The token will be later available by even more trading platforms, which causes the price to rise and increase the Algorithm community.

Growth potential

The potential growth of the Algorithm token is huge and the application will be used by millions of people worldwide. This will lead to an immense value increase very quickly as our user-base grows and more people are ready to join the Algorithm community.

HOW TO BUY ALGRTHM

Here are five simple steps how to buy the Algorithm Token

Get your own wallet

Download for example the app: "Trustwallet". Write down your recovery phrase. Store this phrase in a safe place and never share this phrase with anyone. For more information click here

Buy BNB Smartchain token

Go to the BNB Smartchain token inside the app. Click on "Buy" at the right top. Then select the amount of BNB Smart chain tokens you want to buy. If this is not available in your app due to your country regulations, buy BNB on an exchange and send this to your Trustwallet. For more information click here

Connecting the wallet

Open PancakeSwap on your browser and connect your wallet via Walletconnect. The website of PancakeSwap is: https://pancakeswap.finance/ or click here

Buy Algorithm Token

Go to exchange on PancakeSwap and select BNB at 'From'. Next, paste the contract code in 'To' to select the Algorithm Token. Enter your amounts you want to swap and confirm it to get your first Algorithm Tokens. If your Algorithm Tokens are not showing up in your wallet use the following instructions to add the Tokens onto your wallet page: click here.

Details

Name: Algorithm

Network: Smart Chain
